# WIND PUDDING.

A Happy Valley of Happy Homes.

Sunlight and Somnolence of

Under the Observation of Reporters For The Daily Eagle.

down upon our homes at the close of such I could divulge some interesting points on a day as was last Thursday. Fires were er added to each bed. Faces were pressed square cut coats and satin breeches, but I the darkness and all shiveringly exclaimed, selves, and I am sure when it is a thing of "Winter has come at last." But winter had the past you will agree with me that Wichnot come. The sun rose the next morning ita is not slow and can do as much in as and all through the day struggled for his short a space of time as any city of its size. supremacy-for this is not a country of winter revels. By evening the clinging mists lifted and the sun went down, but down in triumph, painting all the horizon with the fires of his victory. Kansas is a land of sunrises and sunshine

mornings are a glory, our days a triumph, tinted with the dyes of dreams and the illuminates the opalescent deeps of the eastern horison and his light falls on a people like unto whom none others are so blessed; but, when this monarch of climes and seasons has performed its day's task and rolls smile lights up, with a beauty whose rich-locks, was completely severed from the outness and delicacy are indiscribable, one of side plate of the door. The job was very of 1,500 and it is proud of its first railroad. the fairest heritages of earth.

This happy valley of ours is unic influences, and peculiar in the tastes and energies of its inhabitants, and under these seat of a higher civilization. A great boundless valley it is, as level and rich as the Delta valley of unlimited sunshine and perpetual

And, winds, too, does some reader suggest? Yes we have winds, winds such as sweep no other land, winds that are soothing and winds that are storn, winds that sing and whisper and winds that grieve and moan, winds, the invisible sweep of whose pinions are like the spirit of liberty ever caressiing our boundless, billowy prairies, kissing their nodding flowers and swaying grasses, and anon bearing along upon its mighty wings the king of winter and his frozen train. Other lands have pied the house but himself, he got up to see their summer suns and winter winds, but we have a sun that never sleeps and a wind that never tires. While the wind blows in constancy, in boundless majesty the center of light and energy pours down through a rare atmosphere of crystal azure health, harvests

Happy valley, happy homes, happy peo ple. Sun, wind and a vast rich, spen plain, and in the midst, freedom and our bright city. Clouds come, and their shadows oft linger for a day yet a brief bour is the limit, -come a sscene-shifters averting weariness, as night is a relief from day.

And these are the environments, these the influences which envelope this valley of homes. Squallor, lethargy and shiftlessness are incompatable with such surroundings. Peace and plenty spring from energies thus stimulated and love and joy as surely follow as that rivers find the sea.

And Wichita, fair with her rising spirer this Sabbath morning, and 'neath her embowering trees cosily nestling her thousand homes. She is indeed a fair city of homes and as earth can afford nothing higher or better than homes, then a thousand times blessed is our city of homes. As a home is the ideal, the center of all lives and of all aspirations, then how many ideals and aspirations center in our bright young city with its thousand attractive homes. But objects some reader, there are many cities of homes, Aye, but there is but one Wichita, as every traveler will tell you. Up and down her level streets are miles and miles of shady walks, up and down are rows and rows of homes, the palatial residence, the unpretentious cottage, but all homes.

On no streets nor throughout all her suburbs can there be forted a single shanty, or a sonalid hovel, only snug, attractive, cosy shrubbery-surrounded, vine-covered happy homes. But, says another, the city is too new to admit of such a thing as a tumbleddown rookery or poverty and decay. There is nothing to such an objection. When the sun shines as it does here and the wind blows as it does here, and the trees, all de here, the spirit of the people would chafe under and never permit that which is ommon to climes where fogs oppress, clouds discourage and heats wilt. He who has once lived in the happy valley will never live happily elsewhere, and she whose home is in Wichita will never go away to remain. "God made the country and man made the town," except in this instance in which it seems He had the largest hand in both town and country. What health, what life, what virtue, what intellectual triumphs must such a land in such a clime produceand why not, therefore, the higher civilization of which we spoke.

Our river rolls, our city grows, and dome, and spire, and dark-walled, factories, and salaces grand, may, in the days to come, add strife and pride, but squallor, beggary and

YOUTH, BEAUTY AND TALENT.

To the Edstor of the Daily Eagle: What more could be desired to the success of the "coming event" referred to in last Sunday's issue. The committee of arrangements are fortunate in having secured these strong drawing qualities, and the entertainment which gains in interest by its being given under the auspices of the Episcopal church, promises to be the success of the season, The drama selected is "Pearl of Savoy," and there is probably in A Reflex of Local Events That Came the full dramatic range, no play more replete with picturesque surroundings, romantic situations and dramatic climaxes. The music incident to the play is a treat in itself. "The farewell chorus" of the Savoy Our Indian summer ended with Thursday and Peasants as they wander over the mounnight. A black cloud, fringed with angry tains, is a gem, the merit of which is fully flashes and perturbed by mutterings deep brought out by the best vocal talent of our and hollow, veiled the glory of the open city, Solos and duets, both serious and days that of late made simple existence a comic, are interspersed throughout the play

pleasure. In these waning days our brown and the curtain goes down on the last act prairies are sombre and melancholy at best. with a "Welcome Home" chorus by the en-The bending sky alone hedges in their vast tire caste, which is so bright and joyous lonesome limits; a winter's sun may warm that it will send every one home in a good but never brightens them. But how the humor. The strictest attention is being spirit of their utter loneliness becomes intensified and deepened in the presence of a tion, each and every member seems to take December storm whose coming is heralded the most active interest and assume an indiby the light of the electric spark and the vidual responsibility, a fact which redounds rumble of its displacements, as it sweeps most creditably to an amateur organization. built, homes were lighted, an extra comfort- and dainty caps—as well as sweeping trains, charming peasant dresses-pretty slippers

### BURGLARS ON DECK

The grocery store of Williams & Jackson Douglas avenue, was entered by burglars night before last, the safe blown open and but a land of sunsets and, sunsets. Our \$100 in money taken. The burglars effected an entrance through the transom over the curtain off the light and leaves us with the safe is situated at the rear end of the store, near the window. It is a mystery to all who beauties of the inexpressible. The great which the powder was placed, as no drilling saw the safe how the hole was made into which the powder was placed, as no drilling could be found, in fact scarcely a scratch could be seen on the door of the safe. A small rivet hole near the dial was the only place where the charge could be inserted, and no one could tell how that hole could be made. The explosion opened the door with such force that, striking against the such force that such for disc of molten white each recurring morn could be found, in fact scarcely a scratch from his rosy-lined couch of fleecy clouds over the edge of the world and falls into the such force that, striking against the window sill, it made a great dinge the world and falls into the window sill, it made a great dinge the window sill will be th arms of night, the reflex of his vanishing in it. The inside of the door containing the
